There is a ton of evidence at the scene of your injury. It doesn't matter what kind of injury. You need to take photos of everything. You don't know if that spill you slipped in is going to get cleaned up as soon as you leave the store.

## #2 Not Getting Contact Info from Witnesses

Witnesses are so helpful. They will be able to help tell the story for you. You want to be able to get in contact with them after your injury.

# #5 Waiting to Talk to Lawyer

There is a lot you probably don't know about personal injury claims. A lawyer will be able to fill you in on what you don't know. They will be the ones to prevent you from failing.

# #6 Giving the Insurance Company a Statement

---

The insurance company is not who you should put your trust into. They do not want you to get the money you deserve because that means they lose money.

# #7 Hiring the Wrong Lawyer

---

Not all lawyers are the same. You can find a lawyer down the street who will settle your case right away. That doesn't mean that you will end up with the result you deserve. Get someone who knows what they are doing.
